Postharvest Biology and Preservation of Fruit and Vegetables

Guest Editors:

Prof. Dr. Shuhua Zhu
College of Chemistry and
Material Science, Shandong
Agricultural University, Taian
271018, China

Dr. Yanyin Guo
School of Agricultural
Engineering and Food Science,
Shandong University of
Technology, Zibo 255049, China

Deadline for manuscript
submissions:
closed (5 April 2024)

Message from the Guest Editors

This Special Issue focuses on the mechanisms and technology involved in the postharvest biology and preservation of both whole and fresh-cut fruit and vegetables. Topics of interest include, but are not limited to: physiology; biochemistry, molecular biology, omics research on pretreatment, harvesting, packaging materials and methods, storage, microenvironment, transportation, shelf life, diseases, toxins, and bioactive substances. Articles of all types, including original research, opinions, and reviews, are welcome.

Special Issue

Editor-in-Chief

Prof. Dr. Les Copeland
Sydney Institute of Agriculture,
School of Life and Environmental
Sciences, The University of
Sydney, Sydney, NSW 2006,
Australia

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, crossdisciplinary and scholarly open access journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. *Agriculture* is published in an open access format – research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.
Journal Rank: JCR - Q1 (*Agronomy*) / CiteScore - Q2 (*Plant Science*)
