Message from the Guest Editors

Soil provides the essential nutrients, water, and root support that food-producing plants need to grow and thrive. The use of mineral fertilizers and intensive cultivation has had a negative impact on biodiversity, significantly worsening the physical and chemical properties of soils. Sustainable soil management not only reverses this trend but also improves soil fertility. The main goal of sustainable agriculture is to meet society's food needs without compromising the ability of future generations to meet their own needs.

Specific topics of interest include, but are not limited to:

Articles on agroecology, agroforestry, and landscape ecology;

Applications in conservation ecology and the preservation of biodiversity in agriculture;

Soil as a key component for carbon sequestration;

Use of irrigation and fertigation to relieve water stress;

Transformation of nutrients and their interaction with soil enzymes;

Methods for the effective management of ingredients;

Using intelligent soil monitoring tools;

The sustainable use of useful microorganisms in the rhizosphere;

Reclamation of soils contaminated with metals and pesticides.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, crossdisciplinary and scholarly open access journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. *Agriculture* is published in an open access format – research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank: JCR - Q1 (*Agronomy*) / CiteScore - Q2 (*Plant Science*)
