Message from the Guest Editor

Dear Colleagues,

Animal behavior is an important component of animal management. A clear understanding of the individual experience is vital to understanding a specific animal's welfare. One methodology available to understand the relationship between behavior and environment is through the use of remote sensing and GIS technologies. Although GIS technologies are not new, utilizing them for novel applications can enhance the information provided to animal managers regarding space use, resource use, environmental preferences, social interactions, and prevalence of disease or injury. Furthermore, as animal welfare audits are becoming commonplace, examining the results of those audits in a geographical and cultural context may highlight areas in need of further education or socio-geographical factors influencing the results of these evaluations.

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, crossdisciplinary and scholarly open access journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. *Agriculture* is published in an open access format – research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank: JCR - Q1 (*Agronomy*) / CiteScore - Q2 (*Plant Science*)
