Message from the Guest Editors

Sustainable Energy Systems are the solution to many of the problems of the growth of energy demand, and, therefore, their sustainable development must begin to proliferate. These systems must be supported by renewable generation sources, distributed storage and new control and management techniques. Sustainable Energy Systems should be implemented in modern agriculture and rural areas, allowing in the latter a more efficient and sustainable electrification.

With this scenario, this Special Issue is focused on electrification and sustainable energy systems to achieve an improvement in agriculture and rural areas. These developments will allow for a more sustainable and efficient agricultural system and rural areas.

Wine, University of Adelaide,
Urrbrae, SA 5064, Australia

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet. *Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q1 (*Agronomy*) / CiteScore - Q1 (*Agronomy and Crop Science*)
