Message from the Guest Editor

Dear Colleagues,

Climate change is a significant and growing threat to food security, already affecting vulnerable populations in many developing countries and expected to affect an ever-increasing number of people across more areas in the future unless immediate action is taken. Therefore, adaptation strategies need to be developed and tested to compensate for the negative impact of climate change on cropping systems.

This Special Issue will focus on “Climate Change, Agriculture, and Food Security”. We welcome novel research, reviews and opinion pieces covering all related topics, including climate change and adaptation, mitigation, drought, evapotranspiration, crop water requirements, remote sensing, water use efficiency, soil moisture, crop yield gap and loss, management solutions, modeling, case-studies from the field, and policy positions.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet. *Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q1 (*Agronomy*) / CiteScore - Q1 (*Agronomy and Crop Science*)
