Message from the Guest Editor

Dear Colleagues,

Water footprint is one of the critical impact areas of agricultural and food production activities. Therefore, it is critical to present a Special Issue that invites papers on theoretical and practical contributions towards reducing the water footprint for the sustainable development of agricultural systems. The following areas could be of interest for this Special Issue: 1. Life cycle assessment applications in agriculture with a water footprint focus; 2. specific applications of sustainable farming practices (technology, equipment, land treatment, etc.); 3. agricultural value chain and water footprint; 4. innovative irrigation systems; 5. water re-use and recycling in agricultural operations; and 6. circular economy and agricultural and food production.

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet. *Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q1 (*Agronomy*) / CiteScore - Q1 (*Agronomy and Crop Science*)
