

Algorithms in Software Engineering

Guest Editor:

Dr. Piotr Kosiuczenko

Institute of Information Systems,
Faculty of Cybernetics, Military
University of Technology,
Sylwestra Kaliskiego 2, 00-908
Warszawa, Poland

Deadline for manuscript
submissions:

31 October 2024

Message from the Guest Editor

The last two decades have seen significant advances in field of software engineering. This field includes diverse subfields such as system specification, modelling, implementation, testing, analysis, maintenance, software development methodologies, etc. Various methods and algorithms are used for those purposes.

This Special Issue is devoted to algorithms used in software engineering and to the issues related to their development and application. We will publish papers that address the topic of algorithms both in terms of presenting new algorithms, and in how to develop and apply them in the contexts of model creation, evaluation and use, tool development, etc. We are also interested in papers devoted to algorithm engineering, i.e., their design, analysis, implementation, profiling, evaluation and application.

Editor-in-Chief

Germany

Message from the Editor-in-Chief

Algorithms are the very core of Computer Science. The whole area has been considered from quite different perspectives, having led to the development of many sub-communities: Complexity theory (limitations), approximation or parameterized algorithms (types of problems), geometric algorithms (subject area), metaheuristics, algorithm engineering, medical imaging (applications), indicates the range of perspectives. Our journal welcomes submissions written from any of these perspectives, so that it may become a forum for exchange of ideas between the corresponding scientific subcommunities.

Author Benefits

Open Access : free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus**, **ESCI (Web of Science)**, **Ei Compendex**, and **other databases**.

Journal Rank: CiteScore - Q2 (*Numerical Analysis*)
