### Message from the Guest Editors

The mycotoxin contamination of animal feeds is a significant issue in the livestock industry worldwide, with direct impacts on animal health and productivity. We welcome submissions of original research and review papers on this topic. Manuscripts submitted to this Special Issue must not be published previously nor be under consideration for publication elsewhere. Research themes may include, but are not limited to:

- Adverse effects on animal nutrition and health by individual or conjoint mycotoxins;
- Impact of mycotoxins on gut health;
- Bio-indicators of mycotoxins in animals;
- Adsorption, distribution, metabolism, and excretion of mycotoxins;
- New application of detection approaches for the mycotoxins;
- Novel mitigation strategies for mycotoxin contamination (i.e., nutritional approaches, adsorbents, microorganisms and/or their enzymes).

We look forward to receiving your contributions.
