Laboratory of Nutrition, School of Veterinary Medicine, Faculty of Health Sciences, Aristotle University of Thessaloniki, 54124 Thessaloniki, Greece

Deadline for manuscript submissions:

**15 October 2024**

### Message from the Guest Editor

Globally, the ruminant livestock sector is facing two major concerns: product quality and environmental impacts. In this context, novel feed ingredients will serve as tools to address these issues. Aromatic and medicinal plants are rich in bioactive molecules and able to reach considerable concentrations in the final product, offering health benefits to consumers. In addition, they can modify rumen fermentation processes and microbiota populations, leading to lower methane production and N losses, with possible environmental and economical profits. In addition, alternative feedstuffs with diminished cultivation needs and environmental costs, compared to soybean meal and other raw materials which dominate ruminant diets, are being introduced worldwide. For example, lupin seeds and hemp cake, along with various by-products, could serve as ecofriendly feeds in dairy ruminants as well as in beef cattle. This Special Issue will focus on new developments in ruminant nutrition, reducing methane and N losses, and the enhancement of active biomolecules in milk and meat, which will lead to superior quality livestock products and minimize environmental impacts.

2. Curtin University Sustainability Policy (CUSP) Institute, Kent St., Bentley 6102, Australia

## Message from the Editor-in-Chief

*Animals* is an on-line open access journal that was first published in 2011. *Animals* adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. *Animals* is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 3.0 (2022), ranks 12 /62 (Q1) in ‘Agriculture, Dairy & Animal Science’; 13/143 (Q1) in ‘Veterinary Sciences’), 5-Year Impact Factor: 3.2.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, Animal Science Database, CAB Abstracts, and other databases.

**Journal Rank:** JCR - Q1 (*Veterinary Sciences*) / CiteScore - Q1 (*General Veterinary*)
