

## Nanotechnology for Antimicrobials in Medicine and Agriculture, 2nd Volume

Guest Editors:

**Dr. Gonzalo Tortella**

**Prof. Dr. Amedea B. Seabra**

**Dr. Martín A. Fernández-Baldo**

**Dr. Adalberto Benavides-  
Mendoza**

Deadline for manuscript  
submissions:

**31 May 2024**

### Message from the Guest Editors

Dear Colleagues,

The first volume of the Special Issue “Nanotechnology for Antimicrobials in Medicine and Agriculture” was published in 2022. It is a successful issue with 14 published papers and has encouraged us to open a second volume on the same topic. We are honored to invite Dr. Martín A. Fernández-Baldo and Dr. Adalberto Benavides-Mendoza to join us to lead this Special Issue together.

The key motivation behind this Special Issue on “Nanotechnology for Antimicrobials” is to collect knowledge regarding the research and development of nanomaterials that open new possibilities for the effective treatment of diseases from a medical or agricultural point of view. The MDPI journal *Antibiotics* and the editors of this Special Issue invite you to submit review articles and original research papers that provide a broad overview of nanomaterials for the treatment of viral, fungal, or bacterial diseases in humans or in crops. Moreover, manuscripts related to nanomaterials used as an additive in textiles, medical devices, or personal protective equipment to prevent infections are also welcome.

an Open Access Journal by MDPI

## Editor-in-Chief

## Message from the Editor-in-Chief

There are very few fields that attract as much attention as scientific endeavor related to antibiotic discovery, use and preservation. The public, patients, scientists, clinicians, policy-makers, NGOs, governments, and supra-governmental organizations are all focusing intensively on it: all are concerned that we use our existing agents more effectively, and develop and evaluate new interventions in time to face emerging challenges for the benefit of present and future generations. We need every discipline to contribute and collaborate: molecular, microbiological, clinical, epidemiological, geographic, economic, social scientific and policy disciples are all key. *Antibiotics* is a nimble, inclusive and rigorous indexed journal as an enabling platform for all who can contribute to solving the greatest broad concerns of the modern world.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (*Pharmacology & Pharmacy*) / CiteScore - Q1  
(*General Pharmacology, Toxicology and Pharmaceutics*)
