

Efflux Pumps in Bacteria: What They Do and How We Can Stop Them

Guest Editor:

Dr. Tommaso Felicetti

Department of Pharmaceutical
Sciences, University of Perugia,
06125 Perugia, Italy

Message from the Guest Editor

This Special Issue aims to collect high-quality reviews and original papers aiming at enriching our knowledge about microbial efflux pumps, their role in the development of AMR, and strategies to block them by EPI molecules.

Deadline for manuscript
submissions:

15 September 2024

Keywords:

- new antibiotics
- bioactive medicinal agents
- classes of antibiotics
- antibiotic resistance and misuse
- natural antibiotics
- microbial efflux pumps
- efflux pump inhibitors

an Open Access Journal by MDPI

Message from the Editor-in-Chief

There are very few fields that attract as much attention as scientific endeavor related to antibiotic discovery, use and preservation. The public, patients, scientists, clinicians, policy-makers, NGOs, governments, and supra-governmental organizations are all focusing intensively on it: all are concerned that we use our existing agents more effectively, and develop and evaluate new interventions in time to face emerging challenges for the benefit of present and future generations. We need every discipline to contribute and collaborate: molecular, microbiological, clinical, epidemiological, geographic, economic, social scientific and policy disciples are all key. *Antibiotics* is a nimble, inclusive and rigorous indexed journal as an enabling platform for all who can contribute to solving the greatest broad concerns of the modern world.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Pharmacology & Pharmacy*) / CiteScore - Q1
(*General Pharmacology, Toxicology and Pharmaceutics*)
