Message from the Guest Editors

Dear Colleagues,

The recovery of bioactive compounds from agri-food waste has become a hot topic that has seen creative applications in the framework of the circular economy. The most popular examples of agri-food waste valorization involve the energetic sector, with the production of biofuels from biomass through eco-sustainable processes.

The present Special Issue is dedicated to the brand-new use of bioactive compounds derived from agri-food waste to do the following:

- make innovative bio-based products;
- be employed as building blocks to design new compounds;
- be involved in new tailor-made applications sectors.

Moreover, the authors are encouraged to describe green alternative syntheses and procedures.

Dr. Rita Nasti

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Multidisciplinary*) / CiteScore - Q1 (*General Engineering*)
