Message from the Guest Editor

Dear Colleagues,

As you know, air-quality evaluation studies are fundamental for understanding atmospheric processes and developing improved air quality and climate models, for assessing the impact of pollutants on human health and ecosystems, and for developing and evaluating air quality plans. New approaches are continuously developed and need to be shared. In addition, studies which evaluate the impact of nature-based solutions on air quality in urban environments would enhance knowledge in this area.

This Special Issue seeks to collect contributed papers and review articles from different countries and different continents, synthesizing the current understanding of this area and suggesting new questions and directions for further research.

Sincerely,

Dr. Mihaela Mircea Guest Editor

Prof. Dr. Giulio Nicola Cerullo Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32, 20133 Milano, Italy As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.
Journal Rank: JCR - Q2 (*Engineering, Multidisciplinary*) / CiteScore - Q1 (*General Engineering*)
