Deadline for manuscript
submissions:

closed (30 July 2022)

Message from the Guest Editors

Dear Colleagues,

I invite you to contribute to a Special Issue of the journal *Applied Sciences*, "Artificial Intelligence and Ambient Intelligence: Innovative Paths", which aims to present research papers in the interdisciplinary areas of Artificial Intelligence and Ambient Intelligence.

Ambient Intelligence (AmI) is a well-known multidisciplinary approach that aims to improve the way environments and people interact. These environments must be attentive to people's needs and personalize their requirements, predict behaviour and act with sensitivity and attention in a responsible and discreet way.

This Special Issue aims to present research papers in the interdisciplinary areas of Artificial Intelligence and AmI. I thus invite you to submit your innovations and high-quality contributions that demonstrate progress in these areas, in the form of original research papers, mini-reviews, and perspective articles. To this end, we invite innovations and high-quality contributions that demonstrate progress in these areas.

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Multidisciplinary*) / CiteScore - Q1 (*General Engineering*)
