Message from the Guest Editor

Dear Colleagues,

The highly-increasing penetration of distributed energy generation (DGs) and storage systems (DESSs) has changed the face of distribution networks, from passive to active networks (ADNs). This movement has changed different aspects of distribution network operations, such as monitoring, control, and protection schemes. Moreover, ADNs are supposed to be managed according to the smartgrid concept, and, therefore, should be equipped with the new generation of communication, automation, and protection infrastructure. This modernization implies a higher level of requirements regarding the quality of supply. Taking into account all the above, this Special Issue is dedicated to topics related to ADNs, including both technical and economic topics. Submitted manuscripts should be unpublished and report significant advances.

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Multidisciplinary*) / CiteScore - Q1 (*General Engineering*)
