Message from the Guest Editor

The new research progress and challenges of combustion technology and alternative fuels utilization are welcome in this Special Issue.

Keywords

- alternative fuels including biofuel, hydrogen, ammonia, natural gas, LPG, alcohol, ester, ether, syngas, etc.
- the production and utilization of alternative fuel
- fuel combustion
- energy conversion
- hydrogen safety
- emission control
- waste heat utilization
- heat engine
- furnace
- new combustion concepts

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Multidisciplinary*) / CiteScore - Q1 (*General Engineering*)
