### Message from the Guest Editors

Affective and cognitive neuroscience are relevant to essentially all other disciplines. The sole collection of consciously given responses can be misleading, similar to perceived optical illusions. In contrast to that, the brain itself always tells the truth, but it cannot speak. This is where affective and cognitive neuroscience comes into play. Due to growing interest in its capacities by other disciplines, this Special Issue is meant to collect original articles (empirical research), reviews, and theoretical papers around the topic of applied affective and cognitive neuroscience.

### Keywords

- affection

## Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Engineering, Multidisciplinary*) / CiteScore - Q1 (*General Engineering*)
