

Wireless Communication: Applications, Security and Reliability

Guest Editors:

Dr. Ireneusz Kubiak

Military Communication Institute,
05-130 Zegrze Poludniowe,
Poland

Prof. Dr. Tadeusz Wieckowski

Telecommunications and
Teleinformatics Department,
Wrocław University of
Technology, 50-370 Wrocław,
Poland

Prof. Dr. Yevhen Yashchyshyn

Faculty of Electronics and
Information Technology, The
Institute of Radioelectronics and
Multimedia Technology, Warsaw
University of Technology,
Warsaw, Poland

Deadline for manuscript
submissions:

closed (30 June 2023)

Message from the Guest Editors

This Special Issue is dedicated to the presentation of various issues that affect the extension of areas of wireless communication applications, its security, and reliability. Particularly interesting are techniques supporting autonomous systems, wideband communication in different frequency bands, efficient use of spectrum, channel sensing and acquisition, radio environment map construction techniques, protection of information in the aspect of cryptography, and the selection of test methods of new IT devices from the point of view of immunity from electromagnetic fields.

Taking this into account, we would like to invite you to propose novel research in the area of communications and security that can be efficiently applied in the military domain and which would be interesting to the wide audience of the prestigious journal of *Applied Sciences*.

The topics include but not limited to: Wireless communication; Cryptography; Cybersecurity; Electromagnetic immunity.

an Open Access Journal by MDPI

Politecnico di Milano, Piazza L.
da Vinci 32, 20133 Milano, Italy

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Multidisciplinary*) / CiteScore - Q1 (*General Engineering*)
