

Technology and Application of Microwave Communication and Antenna Design

Guest Editors:

Dr. Giovanni Maria Sardi

Institute for microelectronics and
microsystems, 00133 Rome, Italy

Dr. Walter Fuscaldo

Institute for microelectronics and
microsystems, 00133 Rome, Italy

Deadline for manuscript
submissions:

20 September 2024

Message from the Guest Editors

Dear Colleagues,

Antennas are one of the key components in actual and future wireless systems, and with many emerging modern applications, the need for more performant and multi-applications systems is fast becoming a future vision. However, different wireless systems have different requirements, challenging designs for more complex and integrated systems. Key aspects to be addressed are antenna and system performance in a multifunctional environment. For this Special Issue, submissions may focus on novel materials and manufacturing processes, numerical modeling, simulations, optimization methods. This Special Issue of *Applied Sciences* aims to provide an opening for the recent progress in advanced antenna design, technologies, and system analyses. Topics of interest include, but are not limited to, the following:

- Recent advances in antenna analysis and design;
- Optimization design of antenna;
- Novel materials and metamaterial structures for antennas;
- Antennas for various applications;
- Multi-use high-frequency systems.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo

Dipartimento di Fisica,
Politecnico di Milano, Piazza L.
da Vinci 32, 20133 Milano, Italy

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Multidisciplinary*) / CiteScore - Q1 (*General Engineering*)
