Message from the Guest Editors

Cities are changing—this is a reality. As this change occurs, advances in research must propose solutions to the many problems that arise with it. Administrations, universities, and companies must cooperate to lay the foundations of the Smart City.

This SI will be focused on these topics:

- Energy efficiency and sustainability;
- Infrastructure, energy, and the environment;
- Mobility and IoT;
- Governance and citizenship.

Submissions are invited for both original research and review articles. Additionally, invited papers based on excellent contributions to the IV Ibero-American Congress of Smart Cities (ICSC-CITIES 2021) will be included. We hope that this collection of papers will serve as an inspiration for all those interested in the prosperity of smart cities.

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Multidisciplinary*) / CiteScore - Q1 (*General Engineering*)
