Message from the Guest Editors

Dear Colleagues,

In the last two decades, the progress in handwritten text processing has allowed us to increment the performance of the systems devoted to the transcription, indexing, and semantic interpretation of handwritten text documents. The progress has covered all the steps in this field, from image capture and enhancement to information extraction based on the contents of the documents. As a result, lots of data that were difficult to process from the natural language perspective have become available for specialized researchers and the general public, especially when dealing with the contents of historical archives.

The aim of this Special Issue is to attract world-leading researchers in the handwritten text processing field in an effort to show recent progress in the area, including the development of new paradigms and models and new applications of the state-of-the-art technology.

an Open Access Journal by MDPI

Editor-in-Chief

Politecnico di Milano, Piazza L.
da Vinci 32, 20133 Milano, Italy

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Multidisciplinary*) / CiteScore - Q1 (*General Engineering*)
