Message from the Guest Editors

Dear Colleagues,

In the coming years, the “Industry 4.0” is an important hub for mechanical, electrical and other “hidden champion” industries. No matter how, the government, companies, academies have devoted many resource and much effort to raising the industrial. The Internet of Thing (IoT) and Intelligence System are based on Wireless Sensor Networks (WSN) to attach and had become one of the well-known scientific events worldwide in industry. We invite the submission of papers related to various aspects of Wireless Sensor Networks to apply in Intelligence Design and System of industries.

The main topics of interest include, but are not limited to:

Prof. Dr. Subhas Chandra Mukhopadhyay

Prof. Dr. Jih-Fu Tu
