Message from the Guest Editors

Dear Colleagues,

A special issue from the Nordic Meteorology Conference, held in Reykjavík in June 2018. A key denominator is applied meteorology and forecasting of weather and climate in the Nordic regions. This contains verification methods and comparisons of model results, probability forecasts, meteorology and climate for the energy sector, climate services, new data sources and observations and modeling in the Arctic.

Deadline for manuscript

Message from the Editor-in-Chief

Continued developments in instrumentation and modeling have driven atmospheric science to become increasingly more complex with a deeper understanding of concepts, mechanisms, and interactions. This is the field that innovation built and it has led to a better appreciation for the complexity with atmosphere. Human life is intertwined in this complexity as we strive to better understand our atmosphere. Climate change is constantly stretching the limits of our thinking and forcing new ideas and concepts to be played out. Welcome to the Anthropocene!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, Inspec, CAPlus / SciFinder, Astrophysics Data System, and other databases.

Journal Rank: CiteScore - Q2 (*Environmental Science (miscellaneous)*)
