#### Dr. Can Liao

Institute of New Energy Materials and Engineering, Fuzhou University, Fuzhou 350108, China

Deadline for manuscript submissions:

closed (5 November 2024)

## Message from the Guest Editor

Dear Colleagues,

In general, all-solid-state batteries can be classified as inorganic all-solid-state electrolytes, polymer all-solid-state electrolytes, or organic-inorganic composite all-solid-state electrolytes. Up to now, promising progress has been made in all-solid-state lithium battery research. However, the development of all-solid-state batteries, which is still at the laboratory level, still has many challenges, such as process complexity, difficulty in scaling up, and unsatisfactory electrochemical performance.

Therefore, in order to accelerate the commercialisation of all-solid-state lithium batteries, in this Special Issue, "Advanced Materials and Technologies in All-Solid-State Lithium Batteries", we aim to publish research papers related to the development of advanced materials and key technologies for all-solid-state lithium batteries, such as novel electrolyte materials, creative electrolyte structure design, advanced electrolyte preparation technology, safe electrolyte protection strategy, etc. We encourage experts and researchers to contribute relevant articles, letters, and reviews to this Special Issue of *Batteries*.

### **Editor-in-Chief**

#### Prof. Dr. Karim Zaghib

Department of Chemical and Materials Engineering, Concordia University, Montréal, QC H3G 1M8, Canada

## **Message from the Editor-in-Chief**

Take the opportunity to publish your original scientific work or a review paper concerning battery materials, battery technology or battery application within this new open access journal. Along with material science, the journal also addresses engineering and multidisciplinary research topics, such as cell and system design or storage system integration. Publishing proffers visibility for the benefit of other experts and facilitates discussion of the research results within the field. You are invited to publish your work, read published papers and to participate in topical discussions.

#### **Author Benefits**

**Open Access:**— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec,

Ei Compendex, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (Electrochemistry) / CiteScore - Q1 (Electrical and Electronic

Engineering)
