University, Beaumont, TX, USA

Dr. Md Symon Jahan Sajib

Post Doctoral Fellow, Howard
University, Washington, DC,
United States

Prof. Dr. Si Amar Dahoumane

Department of Chemistry and
Biochemistry, Université de
Moncton, Moncton, NB, Canada

Deadline for manuscript
submissions:

closed (15 November 2022)

Message from the Guest Editors

The last two decades have witnessed an exponential growth in cutting-edge research in the field of engineered biomaterials. The diversified use of these valuable biomaterials, either at the nanoscale, microscale, or macroscale, ranges from drug-delivery agents, imaging and detection nanoshuttles in cancer research and therapy, and implants, to name a few. Multiscale simulations are being used as an important tool to design and investigate biomaterials due to the rapid development of computational algorithms and resources. It is powerful in studying the properties of such biomaterials along with their interaction with biological systems. Therefore, a combined research approach consisting of experiments, theoretical analysis, and computational simulations are of paramount importance to acquire new knowledge in the area of biomaterials and accelerate the emergence of innovative and efficient bio-applications.

To this end, we extend this invitation to submit innovative research articles and reviews on subjects pertaining to engineered biomaterials, structures or particles, design or modelling, production methods, characterization, and demonstrations of bio-applications.

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Bioengineering* (ISSN 2306-5354). *Bioengineering* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. *Bioengineering* provides an advanced forum for the science and technology of bioengineering. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Biomedical*)
