Message from the Guest Editors

Dear Colleagues,

Extracellular vesicles (EVs) have a pivotal role in inflammation, and EVs including exosomes, apoptotic bodies, and microvesicles show significant alteration in people who are on drugs of abuse (e.g., cocaine, alcohol, opioids) and in those with inflammatory diseases (e.g., gastrointestinal inflammation, liver diseases, autoimmune, neuroinflammation).

For this Special Issue, we encourage the submission of manuscripts on any aspect of extracellular vesicles including but not limited to the role of extracellular vesicles in disease pathogenesis; biogenesis; intercellular or interorgan communication; biomarkers and therapeutics; Proteomics, lipidomics and metabolomics of EVs; drugs of abuse; inflammatory diseases; etc. We accept reviews, conference proceedings, and short- and full-size research papers which cover the subjects as mentioned above.

Deadline for manuscript
submissions:

closed (31 August 2021)

Message from the Editorial Board

A major strength of biological science is the diversity of approaches that biological scientists apply to their research problems. *Biology* reflects this diversity and brings together studies employing the varied experimental and theoretical approaches that are fueling biological discovery. *Biology*, the journal, is a fully peer-reviewed publication with a rapid and economical route to open access publication and is listed on PubMed. All articles are peer-reviewed and the editorial focus is on determining that the work is scientifically sound rather than trying to predict its future impact.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Biology*) / CiteScore - Q1 (*General Agricultural and Biological Sciences*)
