## Molecular Sciences in Cardiology and Vascular Disorders

Guest Editor:

**Dr. Ye Zeng**

West China School of Basic  
Medical Sciences and Forensic  
Medicine, Institute of Biomedical  
Engineering, Sichuan University,  
Chengdu, China

Deadline for manuscript  
submissions:

**closed (30 June 2025)**

### Message from the Guest Editor

This issue sets forth in an enlightening exploration into the sophisticated realm of molecular biomedicine with an exclusive focus on cardiology and vascular disorders. By harnessing the principles of biology, chemistry, biomechanics, and medical science, this interdisciplinary field has considerably enriched our understanding of the complex operations and mechanisms underpinning the cardiovascular system.

Considering the global prevalence of cardiac and vascular diseases, the necessity for progression in this particular field is heightened. With the implementation of cutting-edge tools and methodologies hailing from molecular genetics, biochemistry, biophysics, and computational biology, cardiovascular research is experiencing a paradigm shift, revealing unprecedented insights, pioneering experimental models, and offering promising therapeutic approaches for these disorders.

The advances made in this vibrant field hold great promise, not only in expanding our understanding of cardiovascular pathophysiology, but crucially in driving forward the development methodology for combating ever-increasing cardiac and vascular disorders.

## Editors-in-Chief

### **Prof. Dr. Jukka Finne**

Research Programme in  
Molecular and Integrative  
Biosciences, Faculty of Biological  
and Environmental Sciences,  
University of Helsinki, P.O. Box  
56, FI-00014 Helsinki, Finland

### **Prof. Dr. Andrés Moya**

Integrative Systems Biology  
Institute, University of Valencia  
and CSIC, 46980 Valencia, Spain

## Message from the Editorial Board

A major strength of biological science is the diversity of approaches that biological scientists apply to their research problems. *Biology* reflects this diversity and brings together studies employing the varied experimental and theoretical approaches that are fueling biological discovery. *Biology*, the journal, is a fully peer-reviewed publication with a rapid and economical route to open access publication and is listed on PubMed. All articles are peer-reviewed and the editorial focus is on determining that the work is scientifically sound rather than trying to predict its future impact.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biology) / CiteScore - Q1 (General Agricultural and Biological Sciences)
