Mitochondrial Dysfunction and Aging

Guest Editor:

Dr. Huiliang Zhang

Department of Pharmacology
and Toxicology, University of
Arkansas for Medical Sciences,
Little Rock, AR 72205, USA

Deadline for manuscript
submissions:

30 November 2025

Message from the Guest Editor

Dear Colleagues,

Biology is calling for submissions to our Special Issue on “Mitochondrial Dysfunction and Aging”. The mitochondria not only work in energy production but also play important roles in reactive oxygen species (ROS and RNS) production, calcium handling, metabolism, cell signaling, etc. Mitochondria have been increasingly recognized as important players in the aging process. Mitochondrial dysfunction is one of the hallmarks of aging and aging-related diseases, including cardiovascular dysfunction, neurodegenerative diseases, skeletal muscle decline, kidney dysfunction, skin aging, immune dysfunction, and stem cell dysfunction. As individuals age, they become increasingly susceptible to various clinical complications. There is an urgent need to elucidate the mechanisms of mitochondrial dysfunction and seek mitochondrial-targeted treatments in aging. In this Special Issue, we welcome submissions of original research, reviews, and mini-reviews.

an Open Access Journal by MDPI

Editors-in-Chief

Prof. Dr. Jukka Finne

Research Programme in
Molecular and Integrative
Biosciences, Faculty of Biological
and Environmental Sciences,
University of Helsinki, P.O. Box
56, FI-00014 Helsinki, Finland

Prof. Dr. Andrés Moya

Integrative Systems Biology
Institute, University of Valencia
and CSIC, 46980 Valencia, Spain

Message from the Editorial Board

A major strength of biological science is the diversity of approaches that biological scientists apply to their research problems. *Biology* reflects this diversity and brings together studies employing the varied experimental and theoretical approaches that are fueling biological discovery. *Biology*, the journal, is a fully peer-reviewed publication with a rapid and economical route to open access publication and is listed on PubMed. All articles are peer-reviewed and the editorial focus is on determining that the work is scientifically sound rather than trying to predict its future impact.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Biology*) / CiteScore - Q1 (*General Agricultural and Biological Sciences*)
