82152 Planegg, Germany

Deadline for manuscript
submissions:

31 May 2024

Message from the Guest Editors

Dear Colleagues,

We are planning a Special Issue in Biology regarding the invasive freshwater jellyfish *Craspedacusta sowerbii*. The focus of the Special Issue will be on the ecological characteristics and population genetics of *Craspedacusta* sp., which are increasingly observed in freshwater systems globally. The Special Issue will bring together different research fields such as the experimental and observational limnology, population genetics and ecology of invasive species. This should help us to gain a more complete overview of the recent state of the art and integrative insights into the highly dynamic processes underlying the worldwide spread of this species. To date, publications about *Craspedacusta* have been rare and often published in very different and specialized journals. This Issue will supplement existing literature by providing an integrated picture of recent developments including modern experimental and molecular approaches.

Special Issue

an Open Access Journal by MDPI

Editors-in-Chief

Prof. Dr. Jukka Finne

Research Programme in
Molecular and Integrative
Biosciences, Faculty of Biological
and Environmental Sciences,
University of Helsinki, P.O. Box
56, FI-00014 Helsinki, Finland

Prof. Dr. Andrés Moya

Integrative Systems Biology
Institute, University of Valencia
and CSIC, 46980 Valencia, Spain

Message from the Editorial Board

A major strength of biological science is the diversity of approaches that biological scientists apply to their research problems. *Biology* reflects this diversity and brings together studies employing the varied experimental and theoretical approaches that are fueling biological discovery. *Biology*, the journal, is a fully peer-reviewed publication with a rapid and economical route to open access publication and is listed on PubMed. All articles are peer-reviewed and the editorial focus is on determining that the work is scientifically sound rather than trying to predict its future impact.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Biology*) / CiteScore - Q1 (*General Agricultural and Biological Sciences*)
