### Message from the Guest Editor

Dear Colleagues,

This Special Issue will pay attention to the recent advances in PAH research. We encourage investigators to submit original (basic and translational) research articles and reviews to this Special Issue with the purpose to address mechanistic insights and decipher novel diagnostic tools and new treatments for PAH.

Topics include, but are not limited to:

- Cellular, molecular and/or hemodynamic mechanisms that drive PAH;
- The role of epigenetics in the pathogenesis of PAH;
- Potential new treatments for PAH;
- Repurposing established drugs for the resolution of PAH;
- New perspectives on direct therapies for right heart failure in PAH.
