## Message from the Guest Editor

Dear Colleagues,

Endometriosis is a chronic, inflammatory, benign disease commonly found in women of reproductive age. However, it can affect people of all ages and has even been found in men and animals, as well as in fetuses. Unfortunately, it tends to take 7–10 years for the diagnosis of endometriosis to be made. This Special Issue provides an excellent opportunity for a thorough analysis of the pathophysiology of the disease, the signs and symptoms, and the type of pain. Categories of endometriosis can be identified, and conservative and surgical techniques can be provided. An important research area is the pain associated with endometriosis. One of the causative factors of the pain experienced in endometriosis is inflammation. The suppression of inflammatory mediators by inhibiting their synthesis might offer novel and effective treatments for the inflammatory pain experienced in endometriosis. This Special Issue welcomes new and innovative original studies and detailed reviews in this field.

Dr. Nikolaos Machairiotis *Guest Editor*

Biomedicines (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research. biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to Biomedicines, be it original research, review articles, or developing Special Issues of current key topics.

#### **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (*Pharmacology & Pharmacy*) / CiteScore - Q2 (*Medicine (miscellaneous)*)
