

## Encephalitis and Viral Infection: Mechanisms and Therapies

Guest Editors:

**Dr. Bradley S. Hollidge**

REGENXBIO Inc., Rockville, MD,  
USA

**Dr. Samantha S. Soldan**

Wistar Institute, Philadelphia, PA,  
USA

Deadline for manuscript  
submissions:

**30 November 2024**

### Message from the Guest Editors

This Special Issue offers a platform for researchers to delve into the intricate relationship between neurovirology, encephalitis, and efficient therapies. Neurovirology and encephalitis are complex and often intertwined fields that are informative to the gene therapy field for treating neurologic diseases. In addition, recent advancements in gene therapies have opened new avenues for understanding and treating these encephalitic and neurologic diseases. This Special Issue acts as a bridge, fostering interdisciplinary collaboration and advancing medical knowledge.

We invite original research articles and reviews that contribute to the understanding of the following aspects within the scope of this Special Issue. By bringing together experts from these diverse fields, this Special Issue seeks to foster collaboration, stimulate innovative research, and ultimately contribute to the development of novel therapeutic interventions for neuroviral infections, encephalitis, and neurologic diseases. We welcome manuscripts that explore the intersections of these disciplines, providing a holistic view of the challenges and opportunities in this critical area of biomedical science.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

*Biomedicines* (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [CAPUS / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q1 (*Pharmacology & Pharmacy*) / CiteScore - Q2 (*Medicine (miscellaneous)*)
