Deadline for manuscript  
submissions:

**30 September 2024**

### Message from the Guest Editors

Dear Colleagues,

Cardiovascular diseases are the leading cause of death worldwide. The relationship between cardiac and vascular structures is not always considered, and these diseases are often underdiagnosed.

The focus of this Special Issue is to develop new insights into the pathogenesis of vascular alterations in cardiac diseases by outlining the complex genetic, biochemical, and molecular aspects at the center of these alterations.

Early identification of cardiac and vascular diseases as well as the correct evaluation of mechanisms and pathogenetic pathways will help to promote the development of targeted therapies.

This Special Issue also aims to cover the landscape of cardiovascular pharmacology. Authors are invited to contribute their research in the field of pharmacological approaches to cardiac and vascular diseases by outlining the most recent advances in therapies and treatments.

The combination of research in pathogenesis and pharmacology will give a comprehensive overview of cardiovascular diseases and the attempts to improve outcomes for patients.

Dr. Francesco Massari

Dr. Pietro Scicchitano

## Message from the Editor-in-Chief

*Biomedicines* (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [CAPUS / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q1 (*Pharmacology & Pharmacy*) / CiteScore - Q2 (*Medicine (miscellaneous)*)
