submissions:

closed (31 March 2024)

Message from the Guest Editors

Tauopathies are a fascinating and vast assembly of neurodegenerative diseases, spanning multiple distinct neuropathological features, cellular phenotypes and clinical presentations. This diversity and complexity make tauopathies particularly challenging to model. Regardless, recent advancements in animal and cellular models have accelerated our knowledge and understanding of these diseases. In parallel, the development and application of new technologies to study and characterize these models have expanded our horizons for what is possible to know. However, we still have a long way to go with regard to untangling the complexity and pleiotropy of *MAPT*, tau and tauopathies, and developing effective therapies and treatments.

We invite authors from any area of the tauopathy field to submit original research or review articles pertaining to this special issue. Studies and opinions on new approaches and technologies that have changed our perspective of the field, where we are currently lacking in our efforts and understanding, and the challenges we face to make meaningful progress are encouraged.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Biomedicines (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [CAPUS / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Medicine (miscellaneous))
