**Dr. Kurt Whittemore** Harvard Medical School, Boston, MA, USA

Deadline for manuscript submissions: closed (30 September 2024) Dear Colleagues,

The cascade of events that occur during cell aging—the process underlying all age-related diseases—is complex, but a unified model is not only feasible but offers optimal clinical targets, such as the telomere. This issue focuses on the role of telomere loss in modulating cell aging and age-related diseases, as well as on the potential to intervene effectively to prevent and cure such age-related diseases through the use of telomerase and similar approaches to effectively reverse cell aging.

### Message from the Editor-in-Chief

Biomedicines (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research. biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to Biomedicines, be it original research, review articles, or developing Special Issues of current key topics.

# **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Medicine (miscellaneous))
