#### Dr. Marta Rodríguez Moreno

- 1. Pathology Department, IIS-Fundación Jiménez Díaz-UAM, Madrid, Spain
- 2. Center for the Biomedical Research Network in Oncology (CIBERONC), E-28040 Madrid, Spain

Deadline for manuscript submissions:

30 June 2024

## **Message from the Guest Editors**

The incidence of lymphoma has gradually increased over previous decades, and it ranks among the ten most prevalent cancers worldwide. With the development of targeted therapeutic strategies, though a subset of lymphoma patients have become curable, the treatment of refractory and relapsed diseases remains challenging. Many efforts have been made to explore new targets and develop corresponding therapies. In addition to novel antibodies targeting surface antigens, and small molecular inhibitors targeting oncogenic signaling pathways and tumor suppressors, immune checkpoint inhibitors have rapidly developed to target the microenvironment. Although these targeted agents have shown great success in treating lymphoma patients, adverse events should be noted. We systematically outlined the advances in targeted therapy for malignant lymphoma, providing a clinical rationale for mechanismbased lymphoma treatment in the era of precision medicine.

Biomedicines (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research. biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to Biomedicines, be it original research, review articles, or developing Special Issues of current key topics.

#### **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (*Pharmacology & Pharmacy*) / CiteScore - Q2 (*Medicine (miscellaneous*))
