### Message from the Guest Editors

Dear Colleagues,

The activation of oncogenic transcription factors (NF- $\kappa$ B, STAT3, STAT5, AP-1, etc.) and proteins (Ras, Raf, Src, etc.) plays an important role in tumorigenesis. The mechanisms regulating the activation of these transcription factors and proteins are complex and constantly evolving. This Special Issue will explore the role of oncogenic transcription factors/proteins in carcinogenesis and highlight novel pharmacological strategies that can be used to target them, subsequently mitigating the processes of abnormal proliferation and survival of tumor cells.

Dr. Gautam Sethi

## Message from the Editor-in-Chief

*Biomedicines* (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [CAPUS / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q1 (*Pharmacology & Pharmacy*) / CiteScore - Q2 (*Medicine (miscellaneous)*)
