205 Materials Science &
Engineering, University of
California, Riverside, CA 92521,
USA

Dr. Shantanu Pradhan

Department of Biotechnology,
Indian Institute of Technology
Madras, Chennai, India

Deadline for manuscript
submissions:

closed (30 September 2023)

Message from the Guest Editors

The loss of tissue function with aging is one of the most immutable, and most costly, challenges in modern medicine. While this challenge may be daunting, researchers and clinicians have a growing set of tools provided by biomedical sciences. With the development of new pharmaceutical screening techniques, drug delivery systems, biomaterials, and engineered tissues, discovery and clinical translation can occur faster than ever before. Unfortunately, many of these developments are not targeted specifically to aging, may not account for the unique challenges and opportunities of aging research, and may not be broadly disseminated to the aging community. The intent of this Special Issue is to highlight the latest advances in biomaterials and biomolecules as applied in the context of aging.

an Open Access Journal by MDPI

Editors-in-Chief

Prof. Dr. Peter E. Nielsen

Department of Cellular and
Molecular Medicine, Faculty of
Health and Medical Sciences,
University of Copenhagen,
Blegdamsvej 3C, DK-2200
Copenhagen, Denmark

Prof. Dr. Lukasz Kurgan

Department of Computer
Science, Virginia Commonwealth
University, Richmond, VA 23284,
USA

Message from the Editorial Board

Biomolecules is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Biochemistry*)
