# The Amazing World of IDPs in Human Diseases

Guest Editors:

## Dr. Simona Maria Monti

Institute of Biostructures and Bioimaging (IBB)-CNR, Via Pietro Castellino, 111, 80131 Napoli, Italia

### Dr. Giuseppina De Simone

Biostructure and Bioimaging Institute-CNR, Via Mezzocannone 16, 80134 Naples, Italy

## Dr. Emma Langella

Biostructure and Bioimaging Institute-CNR, Via Mezzocannone 16, 80134 Naples, Italy

Deadline for manuscript submissions:

closed (15 October 2020)

## **Message from the Guest Editors**

It is now clearly established that some proteins or protein regions are devoid of any stable secondary and/or tertiary structure under physiological conditions, but still possess fundamental biological functions. These intrinsically disordered proteins (IDPs) or regions (IDRs) have peculiar features due to their plasticity as the capacity of binding their biological targets with high specificity and low affinity, and the possibility of interaction with numerous partners. IDPs and IDRs are especially prevalent in eukaryotes suggesting the necessity of disorder. However, also a correlation between intrinsic disorder and various human diseases such as cancer, diabetes, amyloidoses and neurodegenerative diseases is now evident, highlighting the great importance of the topic.

In this Special Issue, we invite researchers to contribute with original research articles as well as reviews, on the amazing world of the IDPs or IDRs involved with human diseases. In particular, contributions focusing on the prediction, identification and characterization of these, with emphasis to their role in cell-signaling and regulation will be welcomed.

## **Editors-in-Chief**

#### Prof. Dr. Peter E. Nielsen

Department of Cellular and Molecular Medicine, Faculty of Health and Medical Sciences, University of Copenhagen, Blegdamsvej 3C, DK-2200 Copenhagen, Denmark

### Prof. Dr. Lukasz Kurgan

Department of Computer Science, Virginia Commonwealth University, Richmond, VA 23284, USA

## **Message from the Editorial Board**

Biomolecules is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

### **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Biochemistry*)
