Deadline for manuscript  
submissions:

**closed (15 September 2023)**

### Message from the Guest Editor

*Dear Colleagues,*

*We are pleased to invite you to contribute to the Special Issue entitled “Advances in Molecular Mechanisms of Gastrointestinal Tumors” in Cancers. Gastrointestinal cancer is one of the most common malignancies worldwide. The molecular mechanisms of gastrointestinal cancer, particularly several subtypes that are resistant to treatment, have not been fully elucidated.*

*This Special Issue aims to reveal the mechanisms of gastrointestinal tumors, where molecular pathway networks are involved. The molecular mechanism of gastrointestinal tumors is the main scope of this Special Issue.*

*For this Special Issue, original research articles and reviews are welcome. Research areas may include, but are not limited to, the following:*

*Molecular mechanisms, gastrointestinal tumors, gastric cancer, colon cancer, rectal cancer, colorectal cancer, esophageal cancer, cancer stem cell, tumor microenvironment, molecular pathways, molecular networks, pathway networks.*

*We look forward to receiving your contributions.*

## Editor-in-Chief

### Prof. Dr. Samuel C. Mok

Department of Gynecologic  
Oncology and Reproductive  
Medicine, The University of Texas  
MD Anderson Cancer Center,  
Houston, TX 77030, USA

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)

## Message from the Editor-in-Chief

*Cancers* is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.
