Message from the Guest Editors

Dear Colleagues,

This Special Issue is a continuation of the previous Special Issue, “Exclusive Papers in Environmentally Friendly Catalysis in China”, following its great success.

China has achieved important advancements in heterogeneous catalysis and photocatalysis, including the development of catalytic materials, environmental remediation, and sustainable energy production. This Special Issue welcomes both review and original research articles on aspects of heterogeneous catalysis and photocatalysis, with the emphasis being put on fundamental and applied research related to environmentally friendly catalysis in China.
