Message from the Guest Editors

Dear Colleagues,

The liver is the chemical laboratory of living beings. Many metabolites are exported out of cells into the bloodstream or eliminated via the biliary pathway, others are transported between different cell compartments by transmembrane proteins. Mutations of these proteins cause genetic diseases with hepatic and extrahepatic manifestations. In this Special Issue, we aim to underline the functions of the protein transporters in physiological and pathological conditions and their role in drug resistance, aging, and energetic metabolism.

Centre, The University of
Copenhagen, Copenhagen,
Denmark

Message from the Editorial Board

Cells has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [CAPus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Cell Biology*) / CiteScore - Q1 (*General Biochemistry, Genetics and Molecular Biology*)
