submissions:

closed (31 October 2019)

Message from the Guest Editor

Dear Colleagues,

Among the diseases for which microRNAs are known to play critical roles, cancers have been well studied.

There are many known onco-microRNAs and miRNAs suppressing cancers. In spite of that, how individual miRNAs contribute to the progression or suppression of cancers is unclear. Some miRNAs work as onco-miRNA for specific cancers, but as tumor suppressors for others. Further, the expression of onco-miRNA can be suppressed on metastasis.

We invite authors to submit studies related to the identification of novel onco-miRNAs and tumor suppressor microRNAs as well as their mechanisms to this Special Issue of *Cells* “Cancer-Related microRNA”.

Message from the Editorial Board

Cells has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [CAPus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Cell Biology*) / CiteScore - Q1 (*General Biochemistry, Genetics and Molecular Biology*)
