Emerging Therapeutic Approaches for Chronic Liver Diseases

Guest Editors:

Prof. Dr. Ralf Weiskirchen

Head of the Institute of Molecular Pathobiochemistry, Experimental Gene Therapy and Clinical Chemistry (IFMPEGKC), RWTH University Hospital Aachen, Aachen, Germany

Dr. Amit Khurana

1. Translational Liver Research, Medical Cell Biophysics (MCBP), Carre 4417, P.O. Box 217, University of Twente, 7500 AE Enschede, The Netherlands
2. Institute of Molecular Pathobiochemistry, Experimental Gene Therapy and Clinical Chemistry (IFMPEGKC), RWTH University Hospital Aachen, D-52074 Aachen, Germany

Deadline for manuscript submissions:

closed (15 February 2024)

Message from the Guest Editors

Dear Colleagues,

This Special Issue will provide insights into emerging drug targets for chronic liver diseases (CLDs), novel pathways involved in disease progression, potent pharmacological inhibitors, emerging screening tools for screening new chemical entities, the role of drug carriers in addressing the complexity of the disease and cutting-edge technologies for the effective diagnosis and treatment of CLDs.

Keywords

- chronic liver diseases
- hepatitis
- NAFLD
- NASH
- nanomedicine
- translational medicine
- precision-cut tissue slices
- organoids

Prof. Dr. Cord Brakebusch

Biotech Research & Innovation
Centre, The University of
Copenhagen, Copenhagen,
Denmark

Message from the Editorial Board

Cells has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [CAPus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Cell Biology*) / CiteScore - Q1 (*General Biochemistry, Genetics and Molecular Biology*)
