### Message from the Collection Editor

This Topical Collection “Feature Papers in 'Cellular Neuroscience' Section” aims to collect high-quality research articles, review articles, and communications (including opinion and hypothesis papers) in all fields of cellular neuroscience, with a focus on molecular and cell biological research. Since the aim of this Topical Collection is to illustrate, through selected works, frontier research in cellular neuroscience, we encourage Editorial Board Members of Cells or relevant experts and colleagues to contribute papers reflecting the latest progress in their particular research field.

## Message from the Editorial Board

*Cells* has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [CAPus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (Cell Biology) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)
