## Hematopoiesis and Stem Cells

Guest Editors:

**Prof. Giovanni Morrone**

Laboratory of Molecular  
Haematopoiesis and Stem Cell  
Biology, Università degli studi  
Magna Graecia di Catanzaro,  
Catanzaro, Italy

**Dr. Heather M. Bond**

Laboratory of Molecular  
Haematopoiesis and Stem Cell  
Biology, Università degli studi  
Magna Graecia di Catanzaro,  
Catanzaro, Italy

Deadline for manuscript  
submissions:

**closed (31 January 2020)**

### Message from the Guest Editors

Dear Colleagues,

Since the pioneering studies of McCulloch and Till that marked the beginning of modern experimental hematology, over five decades of extensive research have yielded a tremendous wealth of information about the biology of the hematopoietic stem cell (HSC) compartment and the molecular mechanisms that govern its development and homeostasis, and have led to clinical applications of HSCs in the treatment of a variety of congenital and acquired disorders of the hematopoietic system. However, several aspects of HSC biology remain only partially understood, or controversial. This Special Issue of *Cells* aims to collect qualified contributions to shed additional light on our understanding of these cells. Therefore, we invite you to submit original research articles or reviews in all areas of HSC research, in particular focused on topics including, but not limited to:

- HSC heterogeneity
- Interactions between HSCs and the microenvironment in development, adult life and malignancies
- Influence of metabolism on HSC fate choice
- Epigenetic regulation of normal and malignant HSCs
- Stem cells in hematopoietic malignancies: biologic features and targeting strategies

## Editors-in-Chief

**Prof. Dr. Alexander E.  
Kalyuzhny**

Neuroscience, UMN Twin Cities,  
6-145 Jackson Hall, 321 Church St  
SE, Minneapolis, MN 55455, USA

**Prof. Dr. Cord Brakebusch**

Biotech Research & Innovation  
Centre, The University of  
Copenhagen, Copenhagen,  
Denmark

## Message from the Editorial Board

*Cells* has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [CAPus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Cell Biology*) / CiteScore - Q1 (*General Biochemistry, Genetics and Molecular Biology*)
