Deadline for manuscript
submissions:

closed (31 August 2021)

Message from the Guest Editor

Dear Colleagues,

Embryonic development is a fascinating process requiring a very precise spatiotemporal regulation of cellular proliferation and subsequent differentiation. There are a few model systems addressing experimentally these issues and the vertebrate limb development is one of the more popular ones. This model makes it possible not only to study the embryonic events but also to investigate pathological and repair processes in postnatal life.

All major signaling pathways are activated during the induction, progression, and regeneration of the vertebrate limb. Most cellular processes such as migration, patterning, differentiation are also present. Several types of stem cells have been described, which are present during limb development.

This Special Issue will focus on the latest developments in limb induction, regeneration, and patterning with the particular focus on the cellular and molecular aspects of those processes.

Editors-in-Chief

Dr. Alexander E. Kalyuzhny

Dental Basic Sciences, University
of Minnesota, 308 Harvard St. SE,
Minneapolis, MN 55455, USA

Prof. Dr. Cord Brakebusch

Biotech Research & Innovation
Centre, The University of
Copenhagen, Copenhagen,
Denmark

Message from the Editorial Board

Cells has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [CAPus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Cell Biology) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)
