submissions:

closed (31 January 2020)

Message from the Guest Editor

Dear Colleagues,

The canonical functions of miRNAs are known to bind to mRNA and suppress translation. However, more functions of miRNAs, other than binding to mRNAs, are beginning to be reported. One example is that there are many non-coding RNAs, lncRNA and circRNA, that can interact with miRNAs. For example, some ncRNA can act as a miRNA sponge to absorb miRNAs and suppress the functionality of miRNAs. Any studies that focus on the interaction between miRNA and non-coding RNAs are welcomed.

Prof. Y-h. Taguchi

of Minnesota, 308 Harvard St. SE,
Minneapolis, MN 55455, USA

Prof. Dr. Cord Brakebusch

Biotech Research & Innovation
Centre, The University of
Copenhagen, Copenhagen,
Denmark

Message from the Editorial Board

Cells has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [CAPus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Cell Biology) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)
