### Message from the Guest Editors

Dear Colleagues,

This Special Issue focuses on several areas related to ceramics, glasses and composites, including but not limited to the following: industrial materials, construction and finishing materials, natural materials, waste management, recycling and reuse, the optimization of resources and raw materials, life cycle assessment, greenhouse gas emissions reduction, renewable energy sources, testing and characterization and regulatory aspects.

This Special Issue aims to build a platform for discussion among various stakeholders involved in the ceramics community and sustainable growth, including researchers from academia, industry and government. This valuable exchange of ideas, methods and results will be key in adjusting to the needs of a world which has infinite desires but finite resources.

## Message from the Editor-in-Chief

*Ceramics* (ISSN 2571-6131), an international, open access journal, provides an advanced forum for ceramics science and engineering. Research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We are committed to drive *Ceramics* to a position in which it is recognized for its high-quality, cutting-edge research and scientific influence, and strongly encourage and invite your participation and manuscripts. Your contribution should lead to the development of technical ceramics with better performances and to improve our quality of life.

## Author Benefits

**Open Access:** free for readers, with **article processing charges (APC)** paid by authors or their institutions.

**High Visibility:** indexed within **Scopus**, **ESCI (Web of Science)**, and **other databases**.

**Journal Rank:** CiteScore - Q2 (*Materials Science (miscellaneous)*)
