CO₂, a Carbon Source for Chemicals and Fuels

Guest Editors:

Message from the Guest Editors

Prof. Dr. José Antonio Odriozola

Dr. Luis F. Bobadilla

Dr. Oscar H. Laguna

Deadline for manuscript submissions: closed (15 October 2020) Dear Colleagues,

Currently, the development of Carbon Capture and Utilization (CCU) Technologies plays a key role within the strategies for reducing CO₂ emissions, which aim to decelerate global warming. Therefore, the interest in processes that allow the transformation of CO₂ into fuels or added-value chemicals has been renewed or reinforced, since their real success and profitability rely on a high performance, including high selectivity and energy efficiency.

[...]

This Special Issue of *Reactions* principally focuses on catalytic approaches of chemical and electrochemical transformations of CO₂ into fuels and/or high-added value products. Therefore, the design, characterization and catalytic evaluation of new catalysts are included, as well as the use of advanced catalytic analysis by means of insitu and/or operando approaches and kinetic studies. In addition, the use of catalytic devices, such structured and microstructured reactors or novel reactor designs for catalytic activity measurements during CO₂ transformation will also be considered.

Message from the Editor-in-Chief

Chemistry is a broad science and in *Chemistry* we hope to showcase the excellence of this fundamental discipline. Open Access publishing allows scientists to publish their research in a way that reaches the widest possible audience. In *Chemistry* we aspire to build a genuinely transdisciplinary culture in which communication of results between scientists active in different areas and between scientists and the broader public highlights the benefits that chemistry can bring to society. We encourage papers on all aspects of chemistry ranging from astrochemistry to zoochemistry, with everything in between. We also very strongly welcome inter- and multidisciplinary papers which expand the subject beyond its present horizons. We also welcome themed issues collecting reviews and state-ofthe-art papers in topical areas of chemical science.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), CAPlus / SciFinder, and other databases.

Reliable service: rigorous peer review and professional production.
